

ALDER DUAL PURPOSE JAMB

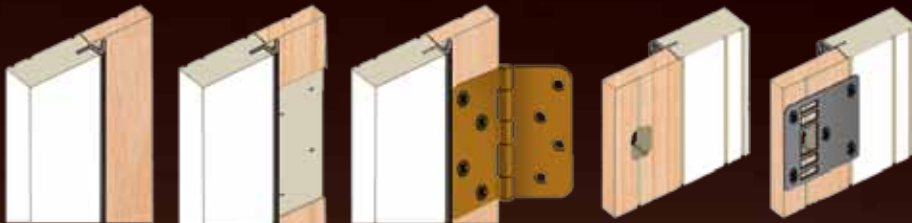

Alder (Red Alder) is a native to the Pacific Northwest. With its light graining and random mineral streaks giving it a rustic yet elegant beauty.

Alder accepts staining from light to dark extremely well. Because of its staining abilities this hardwood can also be used to imitate other more costly hardwoods such as Cherry and Walnut.

Our Alder Dual Purpose Jamb combines the beauty of clear alder with the durability and integrity of finger joint pine. These two products are precision machined and bonded for beautiful and extremely easy to use product.

Options include end work, machine for hinge and strike, Hinge and strike installation and weatherstrip installation.

Only the finger joint portion is factory primed leaving the solid Alder section clear for staining and finishing. Offered in both 4 9/16" and 6 9/16" sizes to fit most applications.
